

MOBILITA ERASMUS+ CROATIA

Jakub Sivák

IV.CP

How I got into the project?

- I joined the **Erasmus+** project by writing a **English Test** and tests from **Profesional subjects** from my field of study **mechatronics**.
- After successfully passing the tests, I was chosen among the lucky ones and we could go on a journey of experiences.

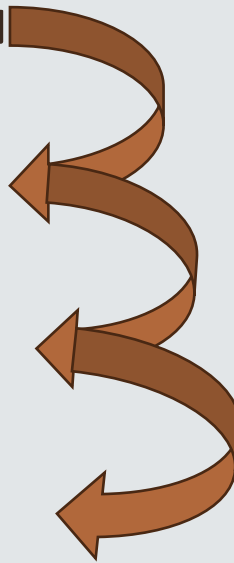

SOMETHING ABOUT CROATIA

Is a southern European and Mediterranean country on the shores of the **Adriatic Sea**.

- Capital city is **Zagreb**
- 4,437,460 inhabitants live in **Croatia**
- The most frequently visited places or cities are:
Split, Dubrovnik, Zadar, Pula, Makarska.

Košice – Michalovce	REX 1907 (žiaci si bezplatný lístok zabezpečia sami)
13:01 – 14:08	

FINALLY THERE

Our first day in Split.

- We arrived at the destination of our 18-hour journey. To the city called **SPLIT**. We went to see where we would be staying. we were accommodated in a hostel called **CROPARADISE SPLIT**. We went to see the city's narrow streets, monuments and squares. At first we got lost but then we found each other and it was fun to walk around such a beautiful city. We had breakfast, lunch and dinner at **INDEX Restaurant**

Split

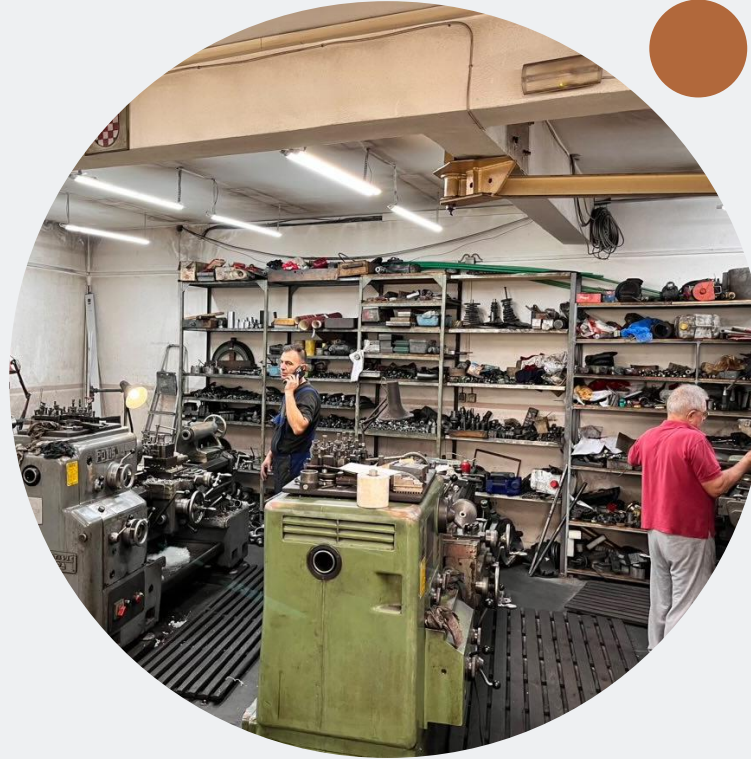

- views

Second Day

- We went to see where we would work with our mentors and leaders. I was working with my friend Martin.
- We went together to the city of **SOLIN** by bus with our beautiful mentor **Korinna Bratic**. She introduced us to a guy who will teach us new things in his job which he enjoys. His name is **Boško Mandaric**.

Our Work Days

- **On the first day, Boško** showed us how the machines work. We worked in safety clothing because the flying sharp shards of iron could hurt us.
- **The Next days** he showed us what he actually works on all day and how things can be easily repaired if you have the right tools and the right people around you, who knows what they are doing. During the next days, people brought him various things to repair
- For example: **Wrench, Brake disc for straightening, Wheel from a racing motorcycle, Alternator, Cardan shaft.**

Our WORK

- Here is a **wrench** where we needed to make a new screw because the old one broke.
- **Brake disc** that needed to be aligned because it was crooked from bad brake pads

Here is a wheel from a racing motorcycle where the old bearing had to be replaced with a new one

Alternator

Cardan Shaft

Alternator

Cardan shaft

Our free time

- we spent our free time walking around the city of Split, swimming at the local beach, which was maybe 2 km away from our accommodation
- We also went on a trip to Makarska and Omiš

Split

- At night

Final Day

- **The last day of Erasmus+.** We had breakfast in the morning. We packed our things and went to say goodbye to our mentors...
- **It was a special moment of our stay in Split in the Erasmus+ program.**
- They gave everyone certificates about the experiences we gained during the stay
